SUMMARY

I'm a final year Software Engineering student and a passionate Full-Stack Developer. Alongside my degree, I completed a Higher Diploma in Software Engineering, which strengthened my expertise in modern frameworks and tools. I specialize in building responsive web applications, scalable backend systems, and mobile experiences with a focus on performance and user satisfaction.

EDUCATION

Undergraduate in Software Engineering

Sindh Madressatul Islam University · Karachi, Pakistan

Advanced Diploma in Software Engineering

Aptech Learning · Karachi, Pakistan · 2025

Intermediate in Pre-Engineering

Govt. Dehli College · Karachi , Pakistan · 2022

SKILLS

Frontend & Backend: HTML , CSS , JavaScript , React.js , Angular , Figma , Node.js , Express.js , Laravel , ASP.NET , .NET Framework

Mobile Development: Flutter , Dart

Databases: Firebase , MongoDB , MySQL , SQL

Programming language: C# , Python , PHP

EXPERIENCE

Web Developer Intern

GAO Tek   October 2023 - April 2024, New York, USA

· Developed a user-friendly e-commerce website using FrontEnd Technologies. Focused on smooth navigation, fast loading times, and SEO best practices to improve the overall user's experience.

Junior Web Developer

Software House   November 2020 - December 2021, Karachi, Pakistan

· Designed and built an interactive analytics platform using HTML, CSS, and modern JavaScript (ES6) and React.js , helping clients to gain valuable insights through a smoother and more engaging user experience.

PROJECT

All Authentication (MERN)

github.com/Fazeelimam/Mern-all-Authentication

· Built a secure authentication system using email and SMS OTP verification, increasing account verification reliability by 90%. Integrated Twilio and Nodemailer to automate OTP delivery, reducing verification time by 40%.

Blog App (MERN)

github.com/Fazeelimam/Blog-App

· Developed a full-stack AI Blog App using MERN Stack integrated with Google Gemini API, reducing content creation time by 60% through automated titles and summaries.

Event Planning Web Application (MERN)

github.com/Fazeelimam/event-mern

· Developed a full-stack event management platform using the MERN stack, simplifying event organization . Implemented JWT-based authentication, ensuring secure login with zero unauthorized access during testing.

Perplexity Clone (Flutter & Dart)

github.com/Fazeelimam/Perplexity-clone-in-Flutter

· Developed a real-time AI Q&A web application using Flutter (Web) and FastAPI, powered by Gemini AI, delivering responses within 15–20 seconds. Designed a modern, Perplexity-inspired UI.

Text to Image Generator (Flutter & Dart)

github.com/Fazeelimam/Text-To-Image-Generator-in-Flutter-Dart

· Built an AI-powered text-to-image generator app using Flutter and the Stability AI API, achieving generating high-quality images from prompts. Designed a modern, responsive UI with optimized rendering and smooth cross-device performance.

E-Book Store App (Flutter & Dart)

github.com/Fazeelimam/E-Book-Application-in-Flutter

· Developed a full-featured eBook Store app using Flutter and Firebase with real-time book listings to where user can read , marking in the books. Integrated Firebase Authentication and Storage to enable secure sign-ups and fully reliable user profile management.
